Abstract (en)  
[origin: EP2706317A1] A compact, readily-manufacturable heat exchanger and a refrigeration cycle apparatus equipped with the same are provided. One of opposite ends of a main body (10) in a refrigerant flowing direction is provided with a first inlet communication hole (3a) that extends in a direction of arrangement of first refrigerant channels (1a) and that communicates with all of the first refrigerant channels (1a). The other end is provided with a first outlet communication hole (4a) that extends in the direction of arrangement of the first refrigerant channels (1a) and that communicates with all of the first refrigerant channels (1a).
