Abstract (en)  
[origin: EP2706517A2] A mobile alarm device is provided, including: an input unit; a location detection unit, obtaining location information of the mobile alarm device; and a mobile communication module, transmitting a digital format report to Central Monitoring Stations via a Global System for Mobile Communications, and transmitting the location information to the CMS, when the input unit is activated by a user, wherein the CMS processes a corresponding operation according to the location information and the digital format report.
