Abstract (en)  
[origin: EP2706548A1] The device has a trough-shaped base portion that is configured for accommodating an electric circuit board arranged with electrical/electronic components for realizing the required functions. The electrical/electronic components are used for function control and are provided with a user interface. An actuator (4) is provided on the upper side of closed base (5) and is arranged one on a base (1) facing away from the main surface. Several layers of composite film (6) configured to partially cover polyurethane (PUR) plastic layer (7).
