Abstract (en)

[origin: EP2706794A2] A method and apparatus are disclosed to indicate PPI in a wireless communication network. The method includes enabling a PPI feature. The method further includes taking a last reported PPI into account when the UE (116, 122, 250, 300) wants to indicate a current PPI for a first time on a current serving cell but not a first time since a full configuration was performed. The method further includes ignoring or not taking into account the last reported PPI when the UE (116, 122, 250, 300) wants to indicate the current PPI for a first time since a full configuration was performed.
