Abstract (en)

[origin: WO2012152653A1] The invention relates to a device and a method for producing multi-layered waffle blocks (1) filled with a spreadable mixture such as a cream, wherein a waffle base sheet coated with a spreadable mixture is transported along a first conveyor surface to a stacking area, a waffle cover sheet (3) is transported along a second conveyor surface (6) to the same stacking area (5), the waffle cover sheet (3) is laid flat on the coated side of the waffle base sheet (2) in the stacking area (5), and then the waffle base sheet (2) and the waffle cover sheet (3) are transported away together. The waffle cover sheet (3) and waffle base sheet (2) are moved respectively in the stacking area (5) at a speed that is different from zero at all moments.
