Abstract (en)
[origin: WO2012152480A1] The invention proceeds from a system module of a case system having at least one functional unit (12) different from a portable tool and having at least one housing element (14) which comprises at least one coupling device (16) for coupling, which can be released by a user, to a system case (18). It is proposed that the system module has a damping means (20) which is provided to fasten the functional unit (12) to the housing element (14) in a damped manner.
