Abstract (en)

[origin: WO2012152380A1] Disclosed is a spindle conveyor for conveying workpieces, in particular vehicle wheels, comprising a rail system (10) that includes at least one support rail (18). Multiple conveyor carriages (34) have a chassis (32) that can be moved on the support rail (18) in a conveying direction (16) and a supporting device (42) for workpieces (14) which is entrained by the chassis (32). Each workpiece (14) can be mounted on a workpiece spindle (54a, 54b) which is part of the supporting device (42). The supporting device (42) comprises a pair (56) of workpiece spindles, i.e. a first and a second workpiece spindle (54a, 54b). The pair (56) of workpiece spindles is mounted so as to be rotatable as a unit relative to the chassis (32) about a vertical axis of rotation (52) and can be moved at least into a first rotational position and a second rotational position. Also disclosed is a station for treating workpieces, in particular vehicle wheels, comprising such a spindle conveyor which allows the workpieces (14) to be conveyed through the station.
