Abstract (en)
[origin: WO2012152828A1] The present invention relates to a bituminous composition, especially to a asphalt composition, comprising bitumen and a comb polymer KP. The invention further relates to the use of a comb polymer KP for decreasing the processing temperature of a bituminous composition, and for reducing the viscosity of bitumen in a bituminous composition and for improving the wettability of aggregates in a bituminous composition. The invention further relates to a process for producing a bituminous composition.
