Abstract (en)

[origin: WO2012156188A1] The invention relates to a method for sewing up a first (102) and a second (104) material to be sewn, comprising the following steps: sewing up the first and the second material to be sewn by means of a yarn (104), wherein a seam bulge (304) is created by the sewing; thermally flattening the seam bulge (304) by exerting a force on the seam bulge (304) and simultaneously heating the seam bulge (304), wherein the temperature of the heating is selected in such a manner that the yarn (100) is softened below the fusion temperature thereof.
