Abstract (en)
[origin: WO2012152683A1] The method according to the invention for sterilizing temperature-sensitive laundry items (1) comprises the following steps: in the dry state, the laundry items are exposed to a process air flow (14) having a defined temperature T_p and over a specified time period, then the laundry items (1) heated in such a way are cooled to a target temperature $T_{p\text{target}}$ significantly lower than the temperature T_p , and then the cooled laundry items (1) are washed in a washing process. The washing-drying unit according to the invention has a control device (CTRL) for carrying out said method.
