Abstract (en)
[origin: WO2012152300A1] The invention relates to a distributor connection module (1) for telecommunications and data technology, wherein the distributor connection module (1) comprises a first sub-module (2) and a second sub-module (3), wherein the first and second sub-modules (2, 3) each have contact elements (7, 13), wherein the contact elements (7, 13) each have an electrical connecting contact (8, 14) and an interface contact (9, 15), wherein the interface contacts (9) of the first sub-module (2) are electrically connected together to the interface contacts (15) of the second sub-module (3) or the interface contacts (9) of the first sub-module (2) are connected to interface contacts (61) of a further sub-module (60) and the interface contacts (15) of the second sub-module (3) are connected to interface contacts (62) of a further sub-module (60), wherein the further sub-modules (60) are disposed between the first and second sub-modules (2, 3).
