Abstract (en)

[origin: EP2708153A1] There is provided with a method for humidifying hair and reducing hair damage that humidifies hair readily and improves hair damage with the use of both positive ions and negative ions.A positive ion generation means 10b for discharging electricity between electrodes applied by a voltage to generate positive ions combined to water molecules and a negative ion generation means 10a for discharging electricity between electrodes applied by a voltage to generate negative ions combined to water molecules are prepared. Hair is humidified and hair damage is reduced by irradiation of hair with the positive and negative ions generated respectively by the positive ion generation means 10b and the negative ion generation means 10a.
