Abstract (en)

The invention relates to a method for forming a loading unit (30) to be handled and/or stocked on a pallet (31), characterised by comprising the steps of: a) forming bundles (20, 20') containing n rows of m containers (1) each, with n different from m, a bottom (3) of each container (1) being shaped so as to be adapted to at least partly receive a top portion (4, 5, 6) of an identical container (1) arranged inferiorly thereto; b) forming a plurality of layers (33, 33'), each of said layers (33) comprising a respective plurality of said bundles (20, 20'); and c) stacking said layers (33, 33') on said pallet (31); every said bundle (20) in each said layer (33) being arranged so as to directly cooperate with at least two bundles (20') in at least one immediately adjacent layer (33').
