Abstract (en)

[origin: EP2708648A2] The device has a first working wagon (7) for installation of a base (1) with respect to the working wagons of the working train. The first mounting unit of first working wagon is provided for mounting the base. The base is installed behind the wheel of the first working wagon, without driving the wheel over the base. The working train behind the first working wagon is provided with a second working wagon (8) having second mounting units for mounting the track (4) from the rear portion of the third working wagons (9) that are forwarded to the second mounting units.
