Abstract (en)
[origin: EP2708674A2] The plastering strip (2) has a fixing area (4), with which the plastering strip is fixed at a component of the transition. A plastering area (10) is determined for plastering in the plaster layer and for fixed connection with a thermal insulation. The fixing area and the plastering strip are formed as a common extrusion part or as separate extrusion parts. The fixing area or the plastering area has a material, whose main component is made from a renewable raw material or wood plastic. Independent claims are included for the following: (1) an end rail for a building-thermal insulation or building-sound insulation; and (2) a plaster-corner strip for arrangement on a vertical or a horizontal building corner, particularly a building corner with thermal insulation.
