Abstract (en)
[origin: EP2708758A1] The distributor (1) has a body (2) comprising a set of assembled blocks (20, 30, 40), and housing a solenoid valve, and presenting, on a body face (150), and a set of contacts (29) connected to the valve. A cap (110) is arranged on the face of the body. A printed circuit (100) is placed between the cap and the body. The circuit carries another set of contacts (109) arranged to establish an electric connection with the former contacts. A joint (80) in form of in layer made of an elastically deformable material is compressed between reliefs (112) of the cap surrounding the circuit and the body.
