Abstract (en)
[origin: EP2708828A2] The arrangement has a decentralized ventilation apparatus (8) comprising an active air conveying device and arranged in a roof structure (7). The roof structure comprises a wall surface that limits an inner surface or dwelling area, where a roof construction (2) supporting a roof membrane is arranged between the roof membrane and the wall surface. The ventilation apparatus is arranged between two rafters (3), where a residential roof window (10) is fastened at the rafters. A frame partially covers the roof window and comprises an air inlet and an air outlet.
