Abstract (en)
[origin: WO2012160461A1] The invention relates to a system for dynamic measurement of the wheel load of a train which includes at least one fishplate (7a) capable of being urged against the web (11) of a railway rail (1a), said fishplate including force sensors (15a, 15b) and recesses (17) capable of holding, in particular, the electric cables and the connectors associated with said sensors.
