Abstract (en)

[origin: WO2012156681A1] A buoyancy element, riser assembly including a buoyancy element and a method of supporting a riser are disclosed. The buoyancy element (400) includes a body (402) of at least partly flexible structure having a volume that is adjustable between an expanded and contracted position, and an entry port (404) for fluid to be supplied to and/or removed from the body to thereby adjust the volume of the body.
