Abstract (en)

[origin: WO2012156115A1] The present invention refers to an apparatus for treatment of portable containers, in particular reusable containers for liquid, sludge and similar, comprising a box like body (1) being formed in the top section thereof with an elongated cut-out (4), a tubular reception port (5), which may be swivelled by means of a pivotal seating, being inserted through said cut-out into said body (1). Said port (5) is adapted to the outlet element of each container to be treated.
