Abstract (en)

[origin: WO2012156240A1] The invention relates to a bracing for a wall, comprising an assembly of filler panels (1) mounted onto a supporting structure, wherein said bracing includes a glass panel and mounting means for rigidly connecting said glass panel to the wall, characterized in that the mounting means include at least one mounting profile (10), the shape of which defines a recess (11) into which the glass panel is inserted and adhesively bonded, the mounting means further including fitting and attachment members for attaching said mounting profile (10) onto a vertical member (2) or a horizontal member of the supporting structure.
