Abstract (en)  
[origin: WO2012161591A1] A walking board system is disclosed. The system comprises a mounting means (200) for connecting a beam element (4) of the walking board system to a support surface (5). The mounting means (200) has a base part (201) provided with a support surface engagement portion (204), a body (202) rotatably connectable to the base part (201), and a clamping member (202) connectable to the body (202). A connector (300) is also disclosed.
