Abstract (en)

[origin: WO2012156617A1] Medical illumination device for operating unit. The invention relates to a medical illumination device for an operating unit, comprising an articulated arm one end of which is fixed and a mobile opposite end of which is connected to a hub (2) comprising at least one region (7) of connection and attachment of a lighting module (9), on which region at least one lighting module (9) is mounted. Each lighting module (9) is of helicoid overall shape.
