Abstract (en)  
[origin: WO2012155894A1] The invention relates to a plug connector housing consisting of at least one housing upper part (1) and at least one housing lower part (5) which together form a plug connector housing. The housing upper part (1) and the housing lower part (5) each have a contact surface (3, 9a, 9b), said contact surfaces (3, 9a, 9b) being at least partly in contact with each other when the housing upper part (1) and the housing lower part (5) are connected to each other. The housing upper part (1) and the housing lower part (5) are made of an electrically conductive material, said housing upper part (1) and lower part (5) having a surface coating that protects against corrosion for example, and the contact between the two contact surfaces (3, 9a, 9b) is formed along an edge (9).
