Abstract (en)

[origin: WO2012159921A1] The invention relates to an apparatus and a method for establishing an electrical contact connection between a printed circuit board substrate (30), which has at least one contact area (42, 44), and at least one plug-side contact (64). At least one contact-making element (46, 48) which comprises a deflectable part (56) and a contact arm (80) is arranged in an insertion region (62). The contact point (50) of said at least one contact-making element can engage with the at least one contact area (42, 44).
