Abstract (en)

[origin: EP2710923A1] The device (2,16,21) has an electrically operated actuator (4) so that furniture (3) is movable driven relative to the furniture main portion (5) by actuator in the assembled state of device depending on the operation of actuator. The recovery portions are provided for obtaining electrical energy from a present form of energy not spacer-bonded in the vicinity of the recovery portion. The recovery portion for electrical power supply is provided with existing electrically operated activators (17,18,20,22) for triggering the operation of actuator by a control action from the outside.
