Abstract (en)

[origin: EP2710947A1] The appliance (1) has an operation liquid (FW,S) that is lead into a processing chamber (2) for rinsing or washing materials. A detecting unit (11) is associated with a safety device for detecting an unwanted splashing liquid below the wet region. The detecting unit and the safety device are combined to a common measuring unit. The common measuring unit is provided with a common sensing unit. The measuring unit is formed of the safety unit. The detection unit is provided to contactlessly detect the movement of the measuring unit.
