Abstract (en)
A dosage system (30) comprising a dosage pump assembly (1) and a sleeve coupling (2), said sleeve coupling being arranged in a collapsible fluid container, wherein the dosage pump assembly (2) comprises a dome part (3); an inner part (4); and a membrane part (5), wherein said dosage pump assembly being designed such that the membrane part is at least partly insertable into the inner part (4) thereby forming a vent part (27); and that the vent part (27) is at least partly insertable into the dome part (3), thereby forming the dosage pump assembly (1), and in that said dosage pump assembly (1) is insertable into the sleeve coupling (2) after the collapsible fluid container is filled with fluid, thereby forming the dosage system (30).
