Abstract (en)

[origin: EP2711186A2] The printing machine has several printing elements (1-6) which are arranged around a pressure cylinder (10). A camera (14) e.g. line camera is provided for recording printed images on a pressure web (11) of the printing units. A memory (15) is provided for storing the recorded printing images. A monitor (16) is provided for reproducing stored print images. Each printing unit is adjusted by control unit relative to the printing cylinder. The camera is provided for receiving the print image in each print position. An independent claim is included for method for adjustment of printing machine.
