Abstract (en)

[origin: EP2711302A1] The packaging machine has a magazine arranged in a feeding area (1) of the machine for a pre-cut part for a quick section change, where the pre-cut part in the magazine is held by adjustable lateral guiding elements (5). A section changing plate (10) is arranged in the feeding area of the machine with a recess suitable to each pre-cut part. The adjustable lateral guiding element is held by a fastening part (4), and a carrier element (8) is held by a holder (7). The section changing plate contains the section information for the placement of the magazine on the pre-cut part.
