Abstract (en)

[origin: EP2711413A1] Washing agent, preferably washing agent for washing clothes, comprises two separate components. The first component is made of a liquid washing agent, and the second component is a booster. An independent claim is also included for dosing the washing agent by means of an automatic dosing device to separate dosing of various components of the washing agent, comprising dosing the first component of the washing agent, and subsequently dosing the second component of the washing agent in the same washing cycle with time interval.
