Abstract (en)

The cooling- and refrigerating device has a communication interface (20), which is designed such that the communication with the interface is carried out in a wireless manner. The interface is designed such that the communication is carried out according to Near field communication technology or Radio frequency identification technology. The interface has a passive or active radio frequency identification tag, which stays in communication with a memory, particularly an Electrically erasable programmable read-only memory. An independent claim is included for a system with a service unit.

Abstract (de)

Die vorliegende Erfindung betrifft ein Kühl- und/oder Gefriergerät mit wenigstens einer Kommunikations-Schnittstelle, die derart ausgeführt ist, dass die Kommunikation mit der Schnittstelle drahtlos erfolgt, wobei die Schnittstelle derart ausgebildet ist, dass die Kommunikation gemäß der NFC-Technologie und/oder gemäß der RFID-Technologie erfolgt.
