Abstract (en)
This invention relates to a modular parcel machine, a device that can work with ATM, payment terminal, control module or any other computer device with an Internet access, and with a monitor or a touch screen monitor for remote communication, while maintaining the functionality of an ordinary parcel machine as well as its visual monitoring and sound and light alarm. The modular parcel machine has a control unit (1) connected to the locker box modules (11), (12), (13), (22), (23), with one communication cable (3) and one power cord (4) and are equipped with a locker containing one master module (2) consisting of at least a power supply system, an image recording device(6), the modem / router with an extended functionality (7) the alarm siren (8) and the cooling and heating system (9).
