Abstract (en)
The present invention refers the field of gold and jewellery products and more specifically it concerns an elastic tennis bracelet. The bracelet comprising an annular concatenation of a plurality of alternating female elements (1, 1') and male elements (2), said female elements (1) having at least two side walls (1c) inclined to one another to define a first angle (\pm), in a diametrically opposite position on said concatenation, at least two second female elements (1') having side walls (1c') inclined to one another to define a second angle (\pm) in order to give said bracelet a substantially oval or elliptical shape.
