Abstract (en)
[origin: EP2712817A1] The device (101) has a tape guiding unit guiding a strap and including a rear-bend guide chain (103), and a conveying mechanism extending and retracting the guide chain. A deflection unit (110) is arranged on a guide carriage (109), and deflects the guide chain. The guide carriage is detachably connected to a conveying direction leading section of the guide chain, and a support structure (130) holds the guide carriage to height from a base during extension and retraction of the guide chain.
