Abstract (en)  
A combination of a lifting hook (1) for lifting a load, for example a plate-shaped material, and a handle (2) for handling the lifting hook, wherein the lifting hook (1) comprises a lower part (3) which provides a support surface for directly bearing of the load and an upper part (4) provided for connection with bearing means for the lifting hook, wherein the handle (2) comprises a sleeve (5) in which at least part of the upper part (4) of the lifting hook (1) is received, and wherein a hand grip (6) is mounted on an outer surface of the sleeve (5) for manually handling the handle (2), wherein the handgrip projects from the handle.
