Abstract (en)
The present invention relates to lifting equipment and cranes used for lifting and loading within the transportation industry, energy industry, process industry and manufacturing industry, and more particularly to a telescopic crane and a telescopic boom arrangement of a telescopic crane. A telescopic crane according to the present invention has a telescopic boom arrangement comprising an articulated arm (1); at least one extendable arm (2), (3); hydraulic pipe conduits (4), (5) arranged on top of said articulated arm (1); and a sliding bearing arrangement (7), (8) arranged at the end region of said articulated arm (1), which telescopic boom arrangement further comprises an opening for said hydraulic pipe conduits (4), (5) on the upper face of said articulated arm (1), which opening is located on the side of said articulated arm (1) so that said hydraulic pipe conduits (4), (5) are at a distance from said sliding bearing arrangement (7), (8) so that said hydraulic pipe conduits (4), (5) lead to hose connections (10), (11) accessible through said opening.
