Abstract (en)

[origin: EP2712980A2] The shuttering panel (1) has a corner recess that is formed at edge. A supporting element is placed in the corner recess for supporting formwork case. A spacer (3) and a metal-made hoisting unit (8) are provided with respective base plates (4,9) from which pins (5,10) are projected. The pins are inserted into an opening formed in corner recess. Two wall sections (6,7,11,12) are protruded toward both sides of each base plate so as to protect the shuttering board.
