Abstract (en)

[origin: EP2713041A2] The device (100) has a freewheel gear box (33) arranged on forehead geometry of an axial confinement. A guide unit is provided in forehead geometry of an outer part and a sinking part e.g. inner recess, ribs, slots and grooves. An outer rim is connected with the guide unit. A closure cap is provided on the axial confinement, the guide unit and the outer part. Outer dimension of the guide unit is less than that of the outer part. An independent claim is also included for a method for manufacturing a turning device.
