Abstract (en)

[origin: EP2713108A2] The device (1) has a component (4) i.e. limiting component, partially made of metallic material and comprising an electrical non-conductive coating (6) i.e. enamel layer, in a surface area (5) and an electrical conductive coating (7) in another surface area (15) i.e. circular surface. Another component is firmly and releasable mounted in an assembly region (8) and designed as an attachment (24) provided to a treatment space i.e. cooking space, of a household apparatus, where the coating is formed by a thermal process. An independent claim is also included for a household apparatus.
