Abstract (en)

An device display controller (404) displays, on a display, a floor plan of a building in which air conditioners are installed, and displays icons representing the air conditioners on portions of the floor plan corresponding to the actual installation locations of the air conditioners. An image data setter (403) associates image data stored in a data storage with the air conditioners according to a specified operation by a user. When a user selects an icon, the device display controller (404) displays, on the display, an image based on the image data that is associated with the air conditioner that is represented by the icon.
