Abstract (en)  
[origin: EP2713126A2] The refrigerator and/or freezer (10) has a cooled interior including an upper wall, a rear wall and an open front side, which is closable by a door. The upper wall includes an illuminating unit (40) in a region, which is arranged close to the open front side than at the rear wall. The illuminating unit includes a movable part, which is arranged such that distribution of light delivered by the illuminating unit depends on a position of the movable part. The illuminating unit includes LEDs as illuminants. The movable part is translationally and/or rotationally movable.
