Abstract (en)
[origin: EP2713435A1] The system has an assembly device (60) that is arranged with a fixing unit (61) for fixing of the assembly device on a parabolic antenna. Another fixing unit (62) is arranged for fixing of the assembly device on a vertical cylindrical component i.e. tubular mast. A set of supports is arranged with a connection unit (63). The connection unit is arranged for providing connection between the set of fixing units. An axis of the vertical cylindrical component is included in a tangent vertical plane of reflectors (51), or in a field located on a side of the antenna with regard to tangent plane.
