Abstract (en)
[origin: WO2012159915A1] The invention relates to a sliding arrangement, in particular an ejector device for drawers, sliding doors, or the like, comprising an ejector arrangement which can be actuated by an overstroke and which has a sliding piece. The sliding arrangement also comprises a retracting device which has a retracting spring and a damper. The aim of the invention is to improve the operating reliability. According to the invention, this is achieved in that the ejector arrangement, the damper, and the retracting spring are mounted on a fitting part.
