Abstract (en)

[origin: WO2012163466A1] The invention relates to a new kind of tooth replacement crown and tooth replacement bridge, of which the components are a framework (3) and a veneer (4), which are reversibly connected to each other by a macro-retentive bonding system (5), and a method for producing the components, in which method these components are preferably produced by means of computer-aided design and computer-aided manufacturing.
