Abstract (en)
[origin: WO2012163889A1] The invention relates to a child safety seat (1) for a motor vehicle, comprising an inside (310, 710, 420) for accommodating a child, an outside (300, 700, 400, 410), at least one inflatable structure (5, 6), which is arranged on the outside (300, 700, 400, 410) of the child safety seat (1), and at least one gas source (8, 9), wherein the gas source provides gas for the at least one inflatable structure (5, 6) in the event of a collision of a motor vehicle in which the child safety seat (1) is arranged. According to the invention, the child safety seat (1) has at least one first inflatable structure (5) on the outside (300, 700, 400, 410) of the child safety seat that inflates substantially in a lateral direction when filled with gas and has at least one second inflatable structure (6) on the outside (300, 700, 400, 410) of the child safety seat that inflates substantially in a forward direction when filled with gas.
