Abstract (en)

[origin: EP2530044A1] The frame (14) has a chamber (16) and an outer opening facing toward a lift shaft (11), where the outer opening is positioned near the chamber. A lift control arrangement is placed in the chamber and provided with a lift control unit and an electronic power unit for operating a lift motor and a main carrier. The lift control unit and the electronic power unit are arranged at the main carrier of the lift control arrangement. The main carrier covers the outer opening facing toward the lift shaft. An independent claim is also included for a lift installation comprising a car.
