Abstract (en)  
[origin: EP2530043A1] The door frame (14) has a chamber (16) and an opening that is formed to be directed towards a lift shaft (11). A lift control arrangement is arranged in the chamber, and is provided with a main portion which closes the opening. A lift control unit is arranged at the main portion. An electronic power unit is configured to connectible with a lift motor, and arranged at the main portion of lift control arrangement. The main portion is comprised of a passage through which cooling object or radiator is extended into the lift shaft. Independent claims are included for the following: (1) a lift shaft closure for separating lift shaft from building story; and (2) a lift installation.
