Abstract (en)

[origin: WO2012164200A1] The invention relates to a method for cutting one or more pieces of glass in at least one glass sheet, including a step for reading information relating to defects in said at least one glass sheet. The method includes a step of automatically and dynamically generating an optimum cutting plane for each of said at least one glass sheet on the basis of at least some of the information relating to the defects.
