Abstract (en)

[origin: CA2836017A1] The invention relates to a multi-layer fabric consisting of several double layers, wherein each double layer is made up of two layers, that is a layer of structured reinforcing threads Vo, Vm, Vu, such as for example carbon fibre threads, and a layer of structured thermoplastic matrix threads M1, M2, such as for example PEEK threads. Several double layers are connected to one another by binding threads B. Furthermore, the invention relates to the use of the multi-layer fabric as a semi-finished product and for producing composites, and to a method for producing composites using a special multi-layer fabric having an "Advanced Synchron Weave" laid fabric structure.
